A NASA Earth System Science Pathfinder Mission

Level 2B GEOPROF-LIDAR P2_R05 Data Issues

Incorrect missing values in swath attributes

Opened:	06/17/21	Severity:	NORMAL
----------------	----------	------------------	--------

The swath attributes "missing" and "missop" for DistanceAvg and CloudFraction fields did not get updated when those values were changed in the code for P2_R05.0. This error affects **all granules of the 2B-GEOPROF-LIDAR product**.

The **correct attributes** are:

DistanceAvg.missing = -8
DistanceAvg.missop = "<="

CloudFraction.missing = -8
CloudFraction.missop = "<="
